Description: Reliance Valves Aquasystem Potable Water Expansion Vessels must be manufactured from stainless steel and have an internal membrane to prevent corrosion and contamination. The membrane opening must be extra wide and the membrane must be replaceable. Expansion vessels must be available from 2 litres to 5000 litres capacity, with a maximum pressure bar ranging from 3.0 to 4.0. Minimum working temperature should be -10°C and a maximum of 99°C.
