Description: Reliance Valves Euromixer 640 Thermostatic Group Mixing Valve (TMV) 4 in1 must be WRAS approved and have high flow rate for feeding up to 10 showers or basins. The TMV should supply 150 lpm flow at 2.5bar pressure loss. The 4in1 TMV must include chrome-plated ball valves, strainers and test point. The valve must have a lockable temperature control and prevent cross-flow.
