

240v Wired Hot Water Timer

A modern and stylish, high performance programmable hot water timer

Overview

Reliance Valves 240v wired hot water timer is a stylish and simple way to control and set hot water programmes.

Easily mounted, the timer communicates with the hot water valve wired directly to the Reliance Valves heating wiring centre, providing hot water control on demand.

Ideal for new builds and renovations, the back plate is fitted before decorating begins and the front plate is installed once work is completed to avoid any damage. Designed to suit a standard pattress box, the timer is also ideal when replacing an existing hot water timer.

When used with the Reliance Valves UFH Controls app, hot water can be remotely controlled on the go.

Features

- 7 days programmable, 15 minutes increments, 4 on/off times give maximum user control and flexibility
- Key lock feature to protect against vandalism and unwanted program changes.
- Hot water boost function allows 1-9 hours boost heating in case of low temperatures in between programming times.
- Using the Reliance Valves app is possible which gives mobile access to system information and settings - so the user can operate and monitor the system remotely from any location.
- The system is compatible for use with Alexa or Google Home voice control
