Description: Reliance Valves Advance Water Meter must be suitable for use in commercial and domestic buildings. Connections must be of a concentric design and suited for direct connection to the Tenant Valve Advanced. The meter must be suitable for use as a primary charging meter with the ability to add a clip-on pulse meter for connection to a pulse counter. The pulse counter connection must enable an M-bus connection to a building management system (BMS) for centralised and remote monitoring. Fitting must be in a horizontal or vertical position and the dial must be fully rotatable. The meter must be suitable for a cold water supply and approved to MID 2014/32/EU.
